Subset Row Cut (SRC) for $\mathcal{C} = \{1, 2, 3\}$:
Bound on total "half-coverage" of $\mathcal{C}$ by all routes

Route	λ	C={1,2,3} visits	⌊visits/2⌋	contribution
Route A: 0→1→2→3→0	0.3	3	1	0.30
Route B: 0→1→3→4→0	0.4	2	1	0.40
Route C: 0→2→4→0	0.2	1	0	0.00
Route D: 0→3→5→0	0.1	1	0	0.00

Sum of contributions = 0.70 | RHS = ⌊|C|/2⌋ = ⌊3/2⌋ = 1
SRC: Σ ⌊visits_r/2⌋ · λ_r ≤ 1 ← SATISFIED
