

Loading Constraints: LIFO vs FIFO

LIFO (Last-In First-Out)
- rear loading, stack policy

Vehicle (rear loading)

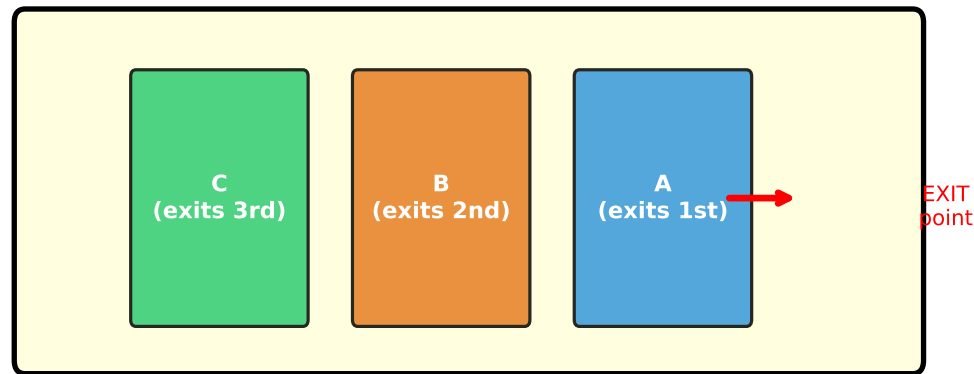

Must unload C, then B, then A (stack order)

LIFO: delivery sequence = reverse of loading sequence

FIFO (First-In First-Out)
- side/conveyor loading

Vehicle (conveyor loading)

A exits first (loaded first), then B, then C

FIFO: delivery sequence = same as loading sequence
