

Chapter 20: Monotone Operators

20.1 Monotone Operators

20.2 Maximally Monotone

20.3 Partial Inverse

20.4 Bivariate Functions

20.5 Fitzpatrick Function

Exercises

Key Concepts

- $\langle x - y \mid u - v \rangle \geq 0$
- Spingarn's Formula
- Maximality via Zorn's Lemma
- Fitzpatrick Characterization
- Moreau's Theorem

Applications

Convex optimization • Fixed-point algorithms • Partial differential equations
