

Sum of Monotone Operators: $A + B$

+

Conditions for Maximal Monotonicity:

$$(i) \text{ cone}(\text{dom } B - L(\text{dom } A))$$

$$= \overline{\text{span}(\text{dom } B - L(\text{dom } A))}$$

(ii) A and B are 3* monotone

(iii) $\text{dom } A \subset \text{dom } B$ and B is 3* monotone

Example

$\partial f + N_C$ is maximally monotone
