

Example Context-Free Grammar (BNF)

Production Rule

Interpretation

$R \mapsto R + R$

R expands to sum of two R's

$R \mapsto x$

R becomes terminal: x

$R \mapsto \ln(R)$

R becomes ln applied to R

$R \mapsto 2$

R becomes terminal: 2

Nonterminals (types): R | Terminals: x, 2, +, ln

The symbol | means OR (multiple production rules for one type)
